

# ZOHD Dart Sweepforward Wing 635mm Wingspan FPV EPP Racing Wing RC Airplane PNP

## ZOHD®

### **Description:**

This Dart Sweep Forward Wing is the first Subter-250g fixed wing that made by EPP material. Detachable main wing and twin-tail wing makes the Dart Wing very easy to install and carry for outdoor flying, what's more, the wings will be disconnected during a crash, thus to protect the main wing and tail wing. You can put a lot of FPV gear and big battery inside the spacious hatch with "NACA" air-inlet. The aileron was enhanced by carbon strips to avoid any flex during flying and enable a precise control.

### **Specifications:**

- 1- Brand Name: ZOHD
- 2- Item Name: Dart sweep forward Wing
- 3- Wingspan: 635mm (25")
- 4- Length: 406mm (16")
- 5- Flying speed: 15km/h - 80+km/h
- 6- Motor: 2006 2400kv
- 7- ESC: 30A w/5V 1A BEC
- 8- Servo: 2pcs 4.3g Digital Servo
- 9- Propeller: 6x3
- 10- PNP Weight: 145g(0.31lb)
- 10- Recommended Battery: 11.1V 1300-1800mAh (not included)

**Features:**

- 1- Innovative Sweep forward wing design with large wing size and twin tail wing, avoid stalling during flying.
- 2- Classical and practical "S" high efficiency airfoil, create powerful elevating force.
- 3- Lightweight but durable EPP molded wing and fuselage, enhanced by built in carbon fiber spars, durable and super crash resistance.
- 4- Detachable wing and tail wing structure, compact size, portable and easy to carry for outdoor FPV fly. "No-glue" required assembly, open box and fly in few seconds.
- 5- Built-in Gyro make the Dart wing fly super stable, and easy to control.
- 6- Spacious equipment bay for more FPV gear.
- 7- With plastic cover to protect the fuselage bottom from landing scratch
- 8- With bump for "CG" mark under the main wing.
- 9- With "NACA" Air inlet and outlet for FPV gear cooling

**PNP Version include:**

\*PNP Dart Sweep forward wing with pre-installed motor / ESC / servos  
(FPV Camera / Battery / radio controller are not included)
